

FIRST ANNOUNCEMENT

FRONTIERS IN TRANSLATIONAL MEDICINE

Translational Medicine (TM) is the breakthrough of medical research in the 21st century. Translational Medicine will improve prevention, diagnostics, the quality and the cost-effectiveness of the whole healthcare system. Its focus is the patient and their care. However, there are many neglected aspects and hidden difficulties in the field which impede its development.

In this project, we wish to

- identify the problems and challenges
- set up recommendations which can facilitate the field
- develop a complex, integrated system of terminology and definitions

We believe that the outcome of this consensus meeting will significantly help basic- and clinical researchers, healthcare professionals, academics, universities, grant committees, journals, and political or economic decision-makers to facilitate the transfer of scientific knowledge to the care of patients.

The consensus meeting will be held in
Budapest, Hungary between 23-24 September, 2019.

**ALL ACADEMIA EUROPAEA MEMBERS ARE WELCOME
TO JOIN THE MEETING!**

Please e-mail us if you wish to participate: p.hegyi@tm-centre.org.
